

ADVANCED UROLOGY

With a team of more than 20 specialists, Temple and Fox Chase Cancer Center have one of the largest urology programs in the region, making it a trusted regional leader in the treatment of urologic conditions.

Temple and Fox Chase provide comprehensive urologic care, treating a wide variety of both oncologic and non-oncologic conditions. Our team includes some of the most experienced urologists in the country, including nationally and internationally recognized experts from Temple and Fox Chase Cancer Center in subspecialties like urogynecology, robotic surgery, and enlarged prostate care.

We work closely with referring physicians and care teams to make sure patients receive seamless, individualized treatments informed by the latest expertise in urologic medicine.

ADVANCED TREATMENT OPTIONS

Our urologists and urologic oncologists provide a wide variety of diagnostic procedures, surgical and non-surgical treatments, and medication management to help patients find relief from urologic issues.

We offer nationally recognized expertise in specialized treatments including:

- An innovative reconstructive urologic surgery program that sets the standard of care across the country. As the busiest robotic and minimally invasive surgery practice in the country, our team has performed over 1,000 surgeries on some of the most high-risk patients and complicated conditions.
- An experienced and compassionate Urogynecology team that has extensive training in diagnosing and treating a wide variety of pelvic floor disorders such as incontinence, vulvar pain, and pelvic organ prolapse.
- Expert-level kidney stone removal and care, with treatment options including percutaneous kidney stone surgery, shock wave therapy, and endoscopic laser therapy.
- Laser therapy for enlarged benign prostates where medical therapy has failed.
- Options for patients with erectile dysfunction include penile implantation and revision prosthetic surgery.
- Fox Chase Cancer Center's multidisciplinary Urologic Oncology team offers experience in treating the most difficult and complex cases of prostate, kidney, bladder, adrenal, testicular, and penile cancers.
- Our urologic surgical oncologists specialize in traditional and minimally invasive surgical techniques, including laparoscopic and robotic procedures utilizing both transperitoneal and retroperitoneal approaches to treat tumors of the urinary tract, male reproductive system, and the adrenal glands.

WHEN TO REFER

Urology is one of medicine's niche specialties, so it can be challenging to find experienced providers, especially for rare conditions.

If your patient requires specialized care, we provide a local solution, offering a highly experienced team of experts and advanced treatment capabilities.

Faster referrals lead to better outcomes, reduce patient anxiety, and increase satisfaction. Call for more information or to schedule a patient appointment.
